NOTICE OF ALLOWANCE

Allowable Subject Matter

1. It is in the opinion of the examiner that the art of record neither anticipates nor renders obvious “radially and proportionally enlarging the cross-section of the thick end section of the aluminum alloy tube by forging the aluminum alloy tube in a first die using a first mandrel in such a manner that the wall thickness of the thick end section after being enlarged is substantially the same as that of the thin section” in combination with the rest of the claimed limitations set forth in the independent claim.

Based on applicant’s arguments and the examiner’s review of the Office Action of December 1, 2005, the claimed subject matter is deemed to be allowable. Further explanation can be reviewed in the applicant’s arguments filed on February 28, 2006.

Further searching by the examiner yielded additional prior art as follows:

Simon (US Patent 4,301,672) states on Column 4, lines 38-40, that expanding is accompanied by thickening the end of the tube.

However the above prior art fails to disclose a reasonable combination of “radially and proportionally enlarging the cross-section of the thick end section of the aluminum alloy tube by forging the aluminum alloy tube in a first die using a first mandrel in such a manner that the wall thickness of the thick end section after being enlarged is substantially the same as that of the thin section.” Therefore, it is concluded by the examiner that claims 1-18 of the present invention are allowable.

Art Unit: 3725

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
